

Connectivity a key aspect

Connectivity is another key aspect: a 600m pipeline facilitating the transportation of up to 2500 Nm³/hr of industrial blast furnace gas.

Additionally, a 500m extension allows us to bring in up to 400 Nm³/hr of converter gas.

- ▶ 2000 Nm³/hr N₂
- ▶ 3000 Nm³/hr O₂
- ▶ 600 Nm³/hr compressed air
- ▶ 400 kg/hr Propane
- ▶ 500 Nm³/hr cooling water
